About Company

We have set up an outstanding example for others showing that rapid growth is possible by strictly maintaining quality of products and serving the clients with complete dedication.

We are engaged in the industry as a distinguished manufacturer, trader and distributor dealing in a number of products like Pre Engineered Building Systems, Pre Structured Building Systems, Pre Engineering Steel Buildings, Pre fabricated steel structures, mezzanine floors, industrial sheds, warehouses, Insulating Roofing and Panels.

Our company is professionally managed by a group of technocrats having versatile knowledge and experience in the discipline. High quality and timely delivery are the two parameters, which have kept us ahead in the industry. The company is a perfect blend of man and machine to deliver its clients with the best possible engineering construction services and allied products at the most competitive prices.

Our Team

The company is ably supported by a team of experienced engineers, technocrats, project managers, skilled workers and marketing professionals, among others.

Their experience, coupled with a sound technical and marketing expertise has propelled the company to become a noted concern in its domain. We are committed to deliver the best, thus leaving no space for quality degradation.

Products We Offer

When it comes to quality and reliability, the building component offered by Astone pre-engineered building & roofing systems is the best without a doubt. The company is a reputed manufacturer and supplier of the following range of products.

»» Pre Engineered Steel Buildings (PEB)

»» Pre Engineered Building

»» Pre Fabricated Steel Structure

»» Warehouses

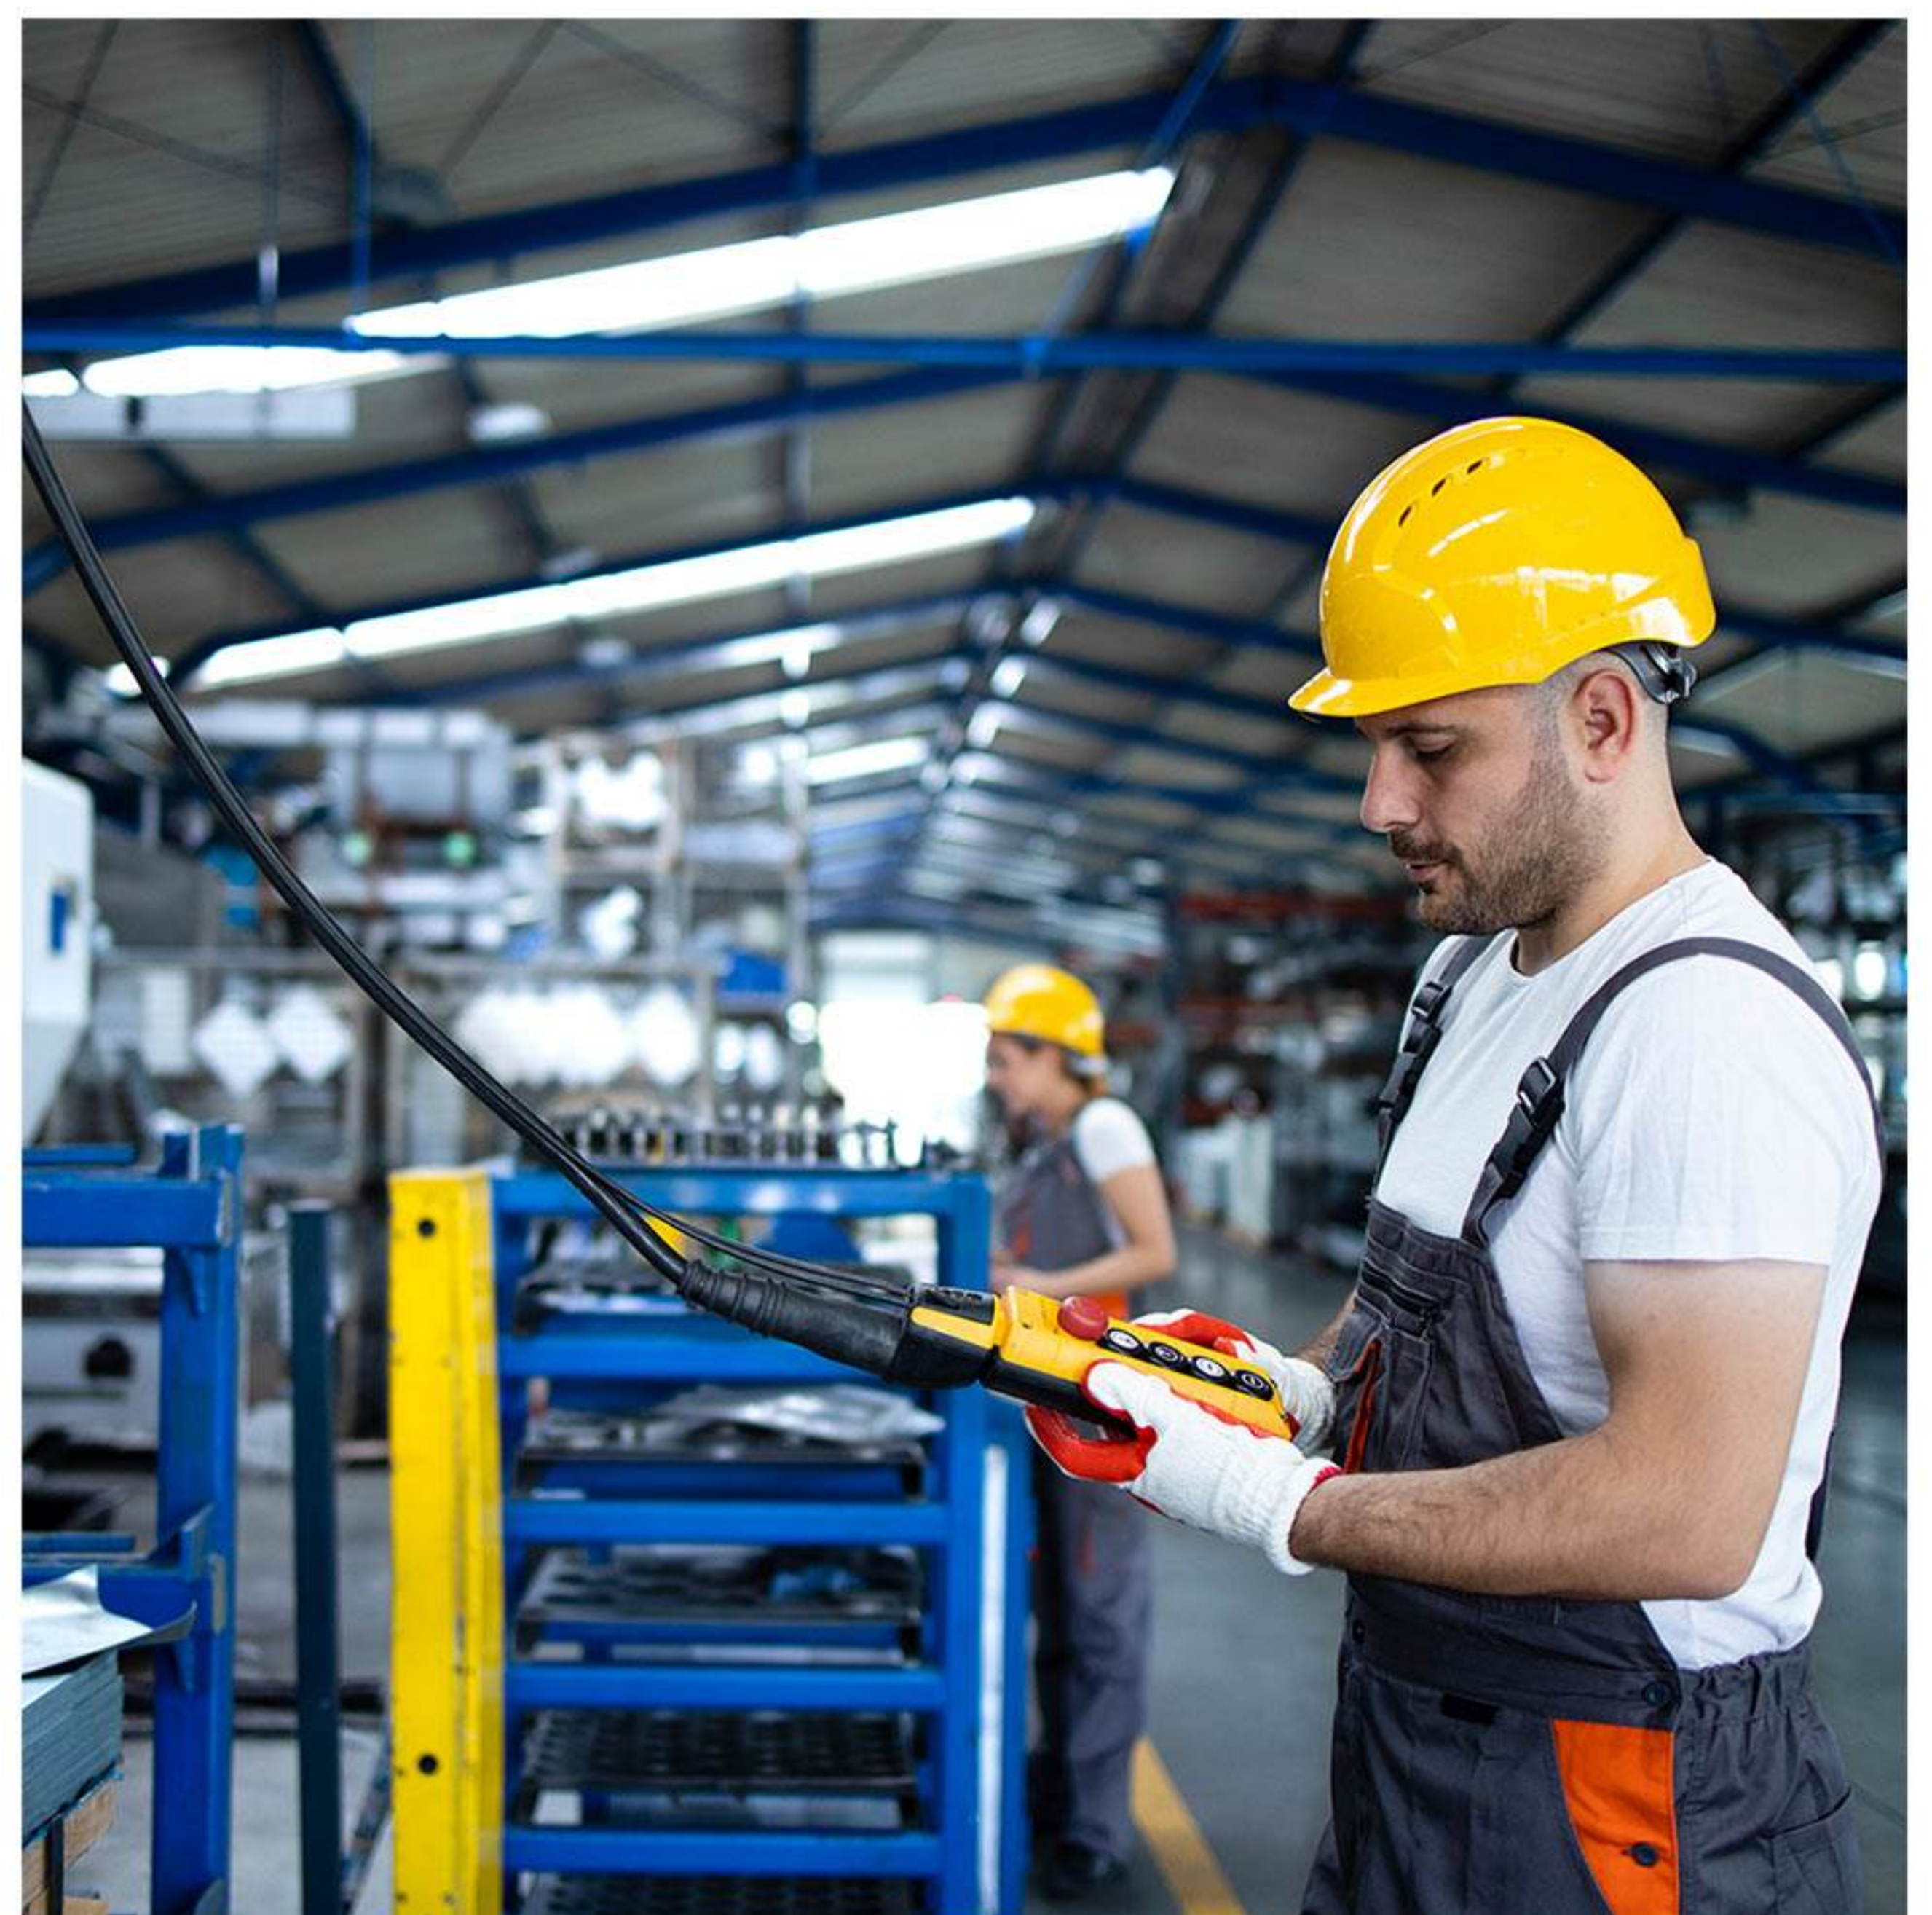

»» Industrial Sheds

»» Insulated Cladding

»» Insulated roofing

»» Mezzanine Floor

»» Foot over Bridges

What is PEB

An increasing number of consumers are opting for Pre-Engineered Building systems because of the significant advantage they offer in terms of time and convenience. Pre-Engineered Buildings, are best constructed as stand-alone buildings precisely engineered to specific user requirements.

PEB components are totally shop fabricated require bolting of components together of the same on site connected to previously completed foundations and sub structures.

They feature a structural steel framework of primary and secondary members (rigid frame, beams, purlins and girts, trusses, and columns) on to which cladding and roofing components are attached. In short, pre-engineered buildings can be as unique as your needs. Buildings intended for commercial, industrial or institutional occupancies can be built precisely, economically & speedily using this concept.

Advantages Of PEB

Extremely Strong Whether Resistance

Architectural Flexibility

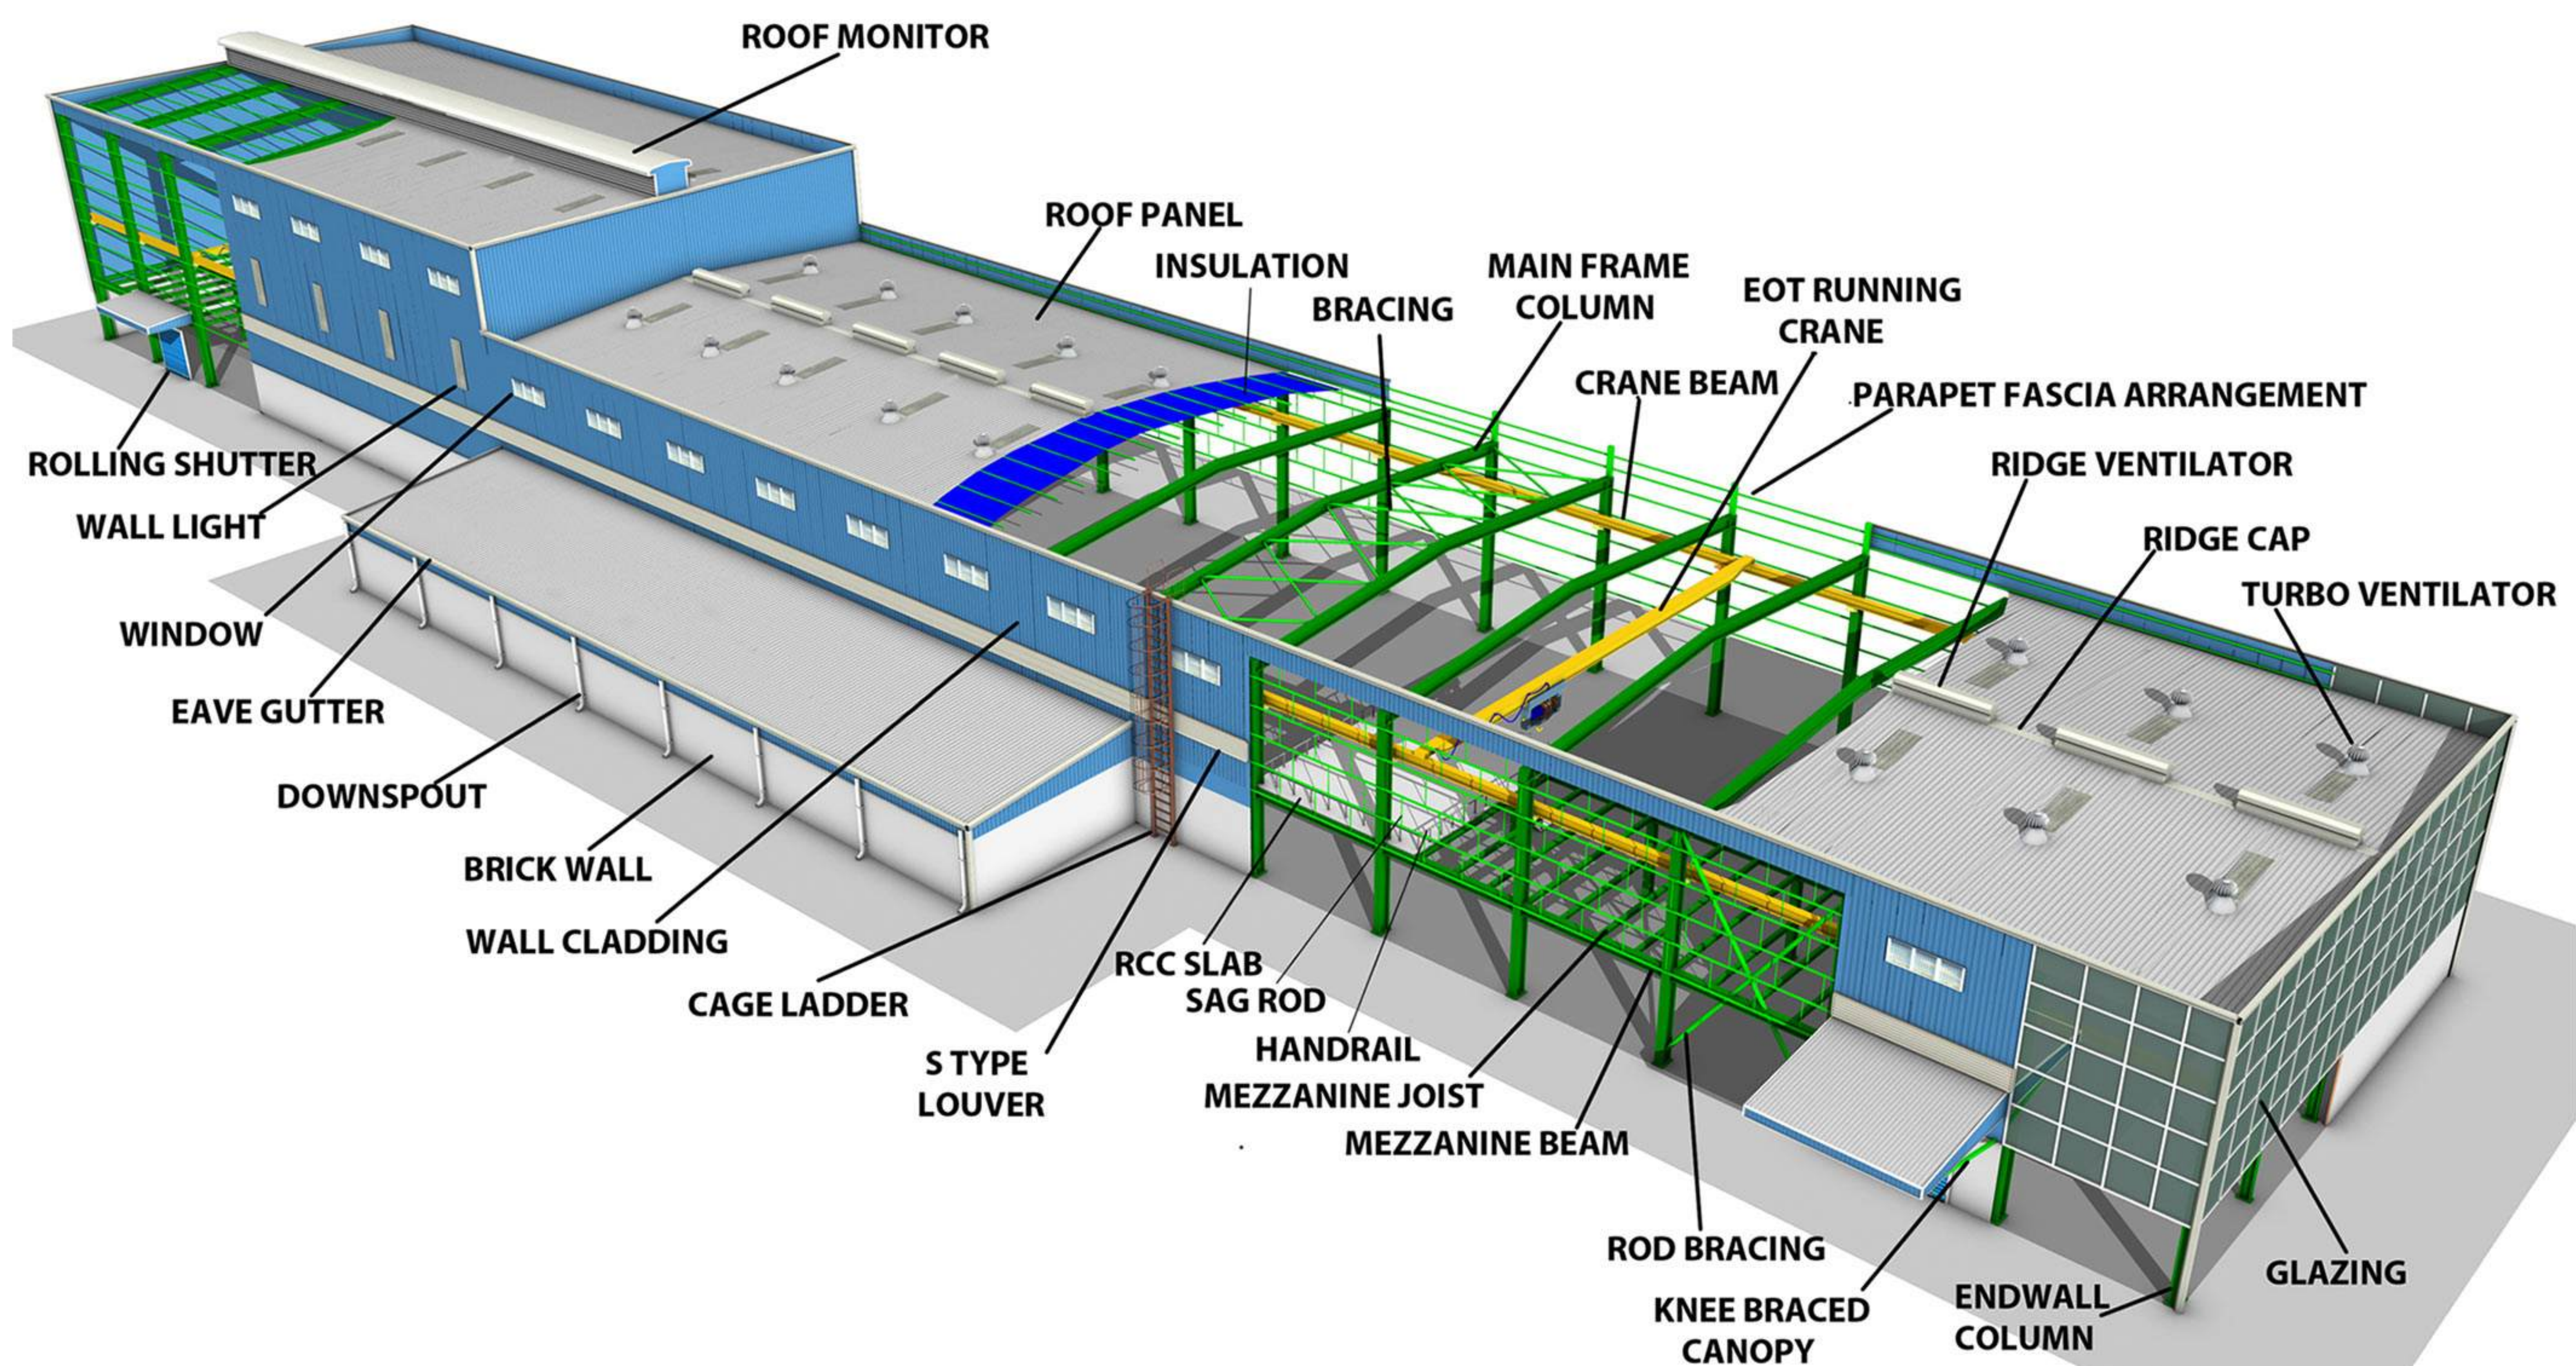

Easy to Assemble

Superior Product Quality

Fast Project Construction

PEB Steel

We have established facilities in India to design detail and manufacture Pre-Engineered Buildings of any size and nature, with full capability to execute projects of any volume all over India. We are known for maintaining time schedule of projects, which is the prime requirement of today's building industry.

We specialize in providing turnkey solutions in Pre-Engineered Buildings in respect of insulation and Noise control. As well to acquaint our capability, we are pleased to present various details including those related to manufacturing of Pre-Engineered Buildings, their complete field erection coupled with necessary Roofing and Cladding.

Building With Cranes

We can design building with most type of crane system such as EOT, monorail, Under-Slung crane etc all type of building. Astone Metal Arc scope of work is limited in this to bracket and crane run way beam which support the crane system, that required to design and estimate building with cranes

Building with Mezzanine

We can provide mezzanine floor in partial or complete area of building to suit loading requirement for office and storage. Mezzanine floor consists steel decks, supported by joint members to the mezzanine beam. Mezzanine main beam usually run across the width of building and are located the main rafters with joint members runs parallel to the length of the building.

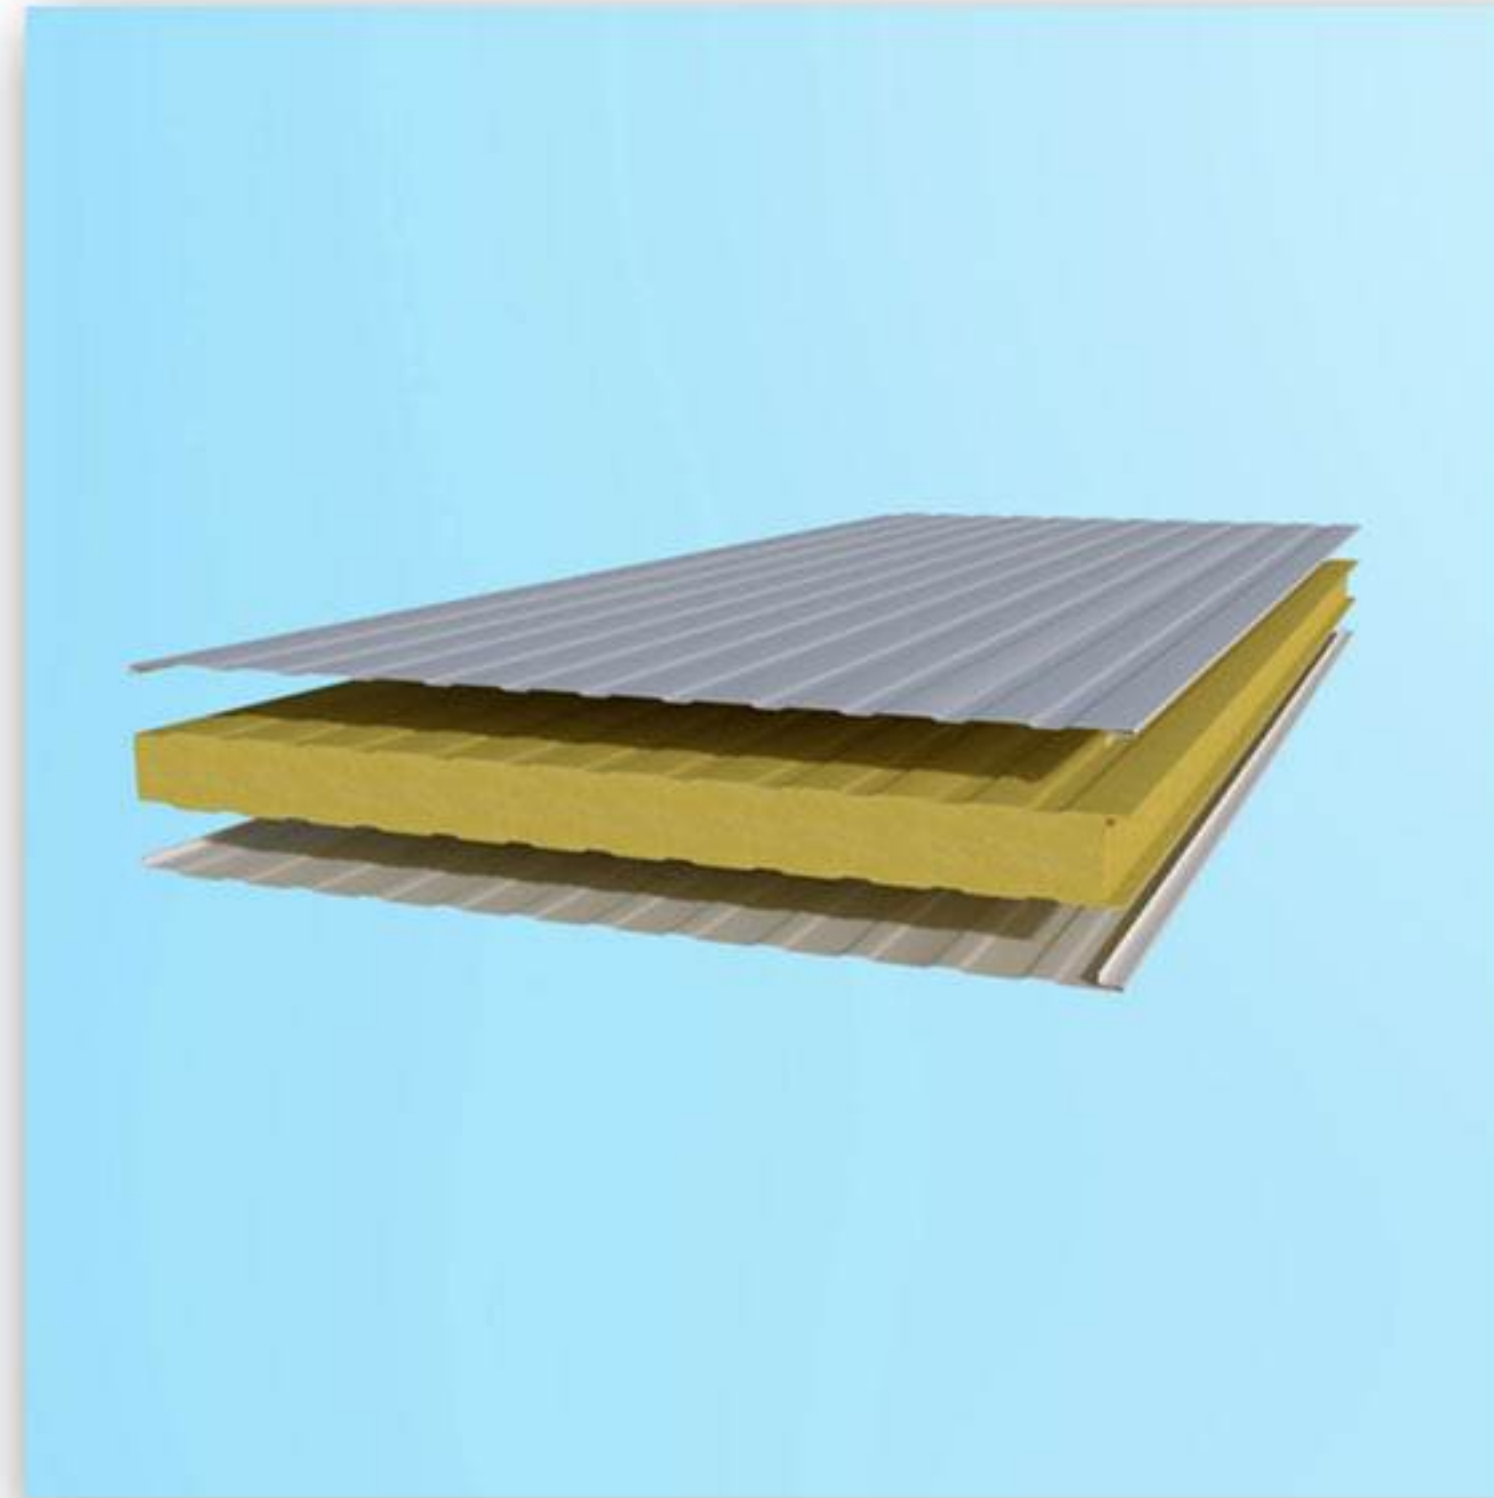

Sheeting & Accessories

Canopy

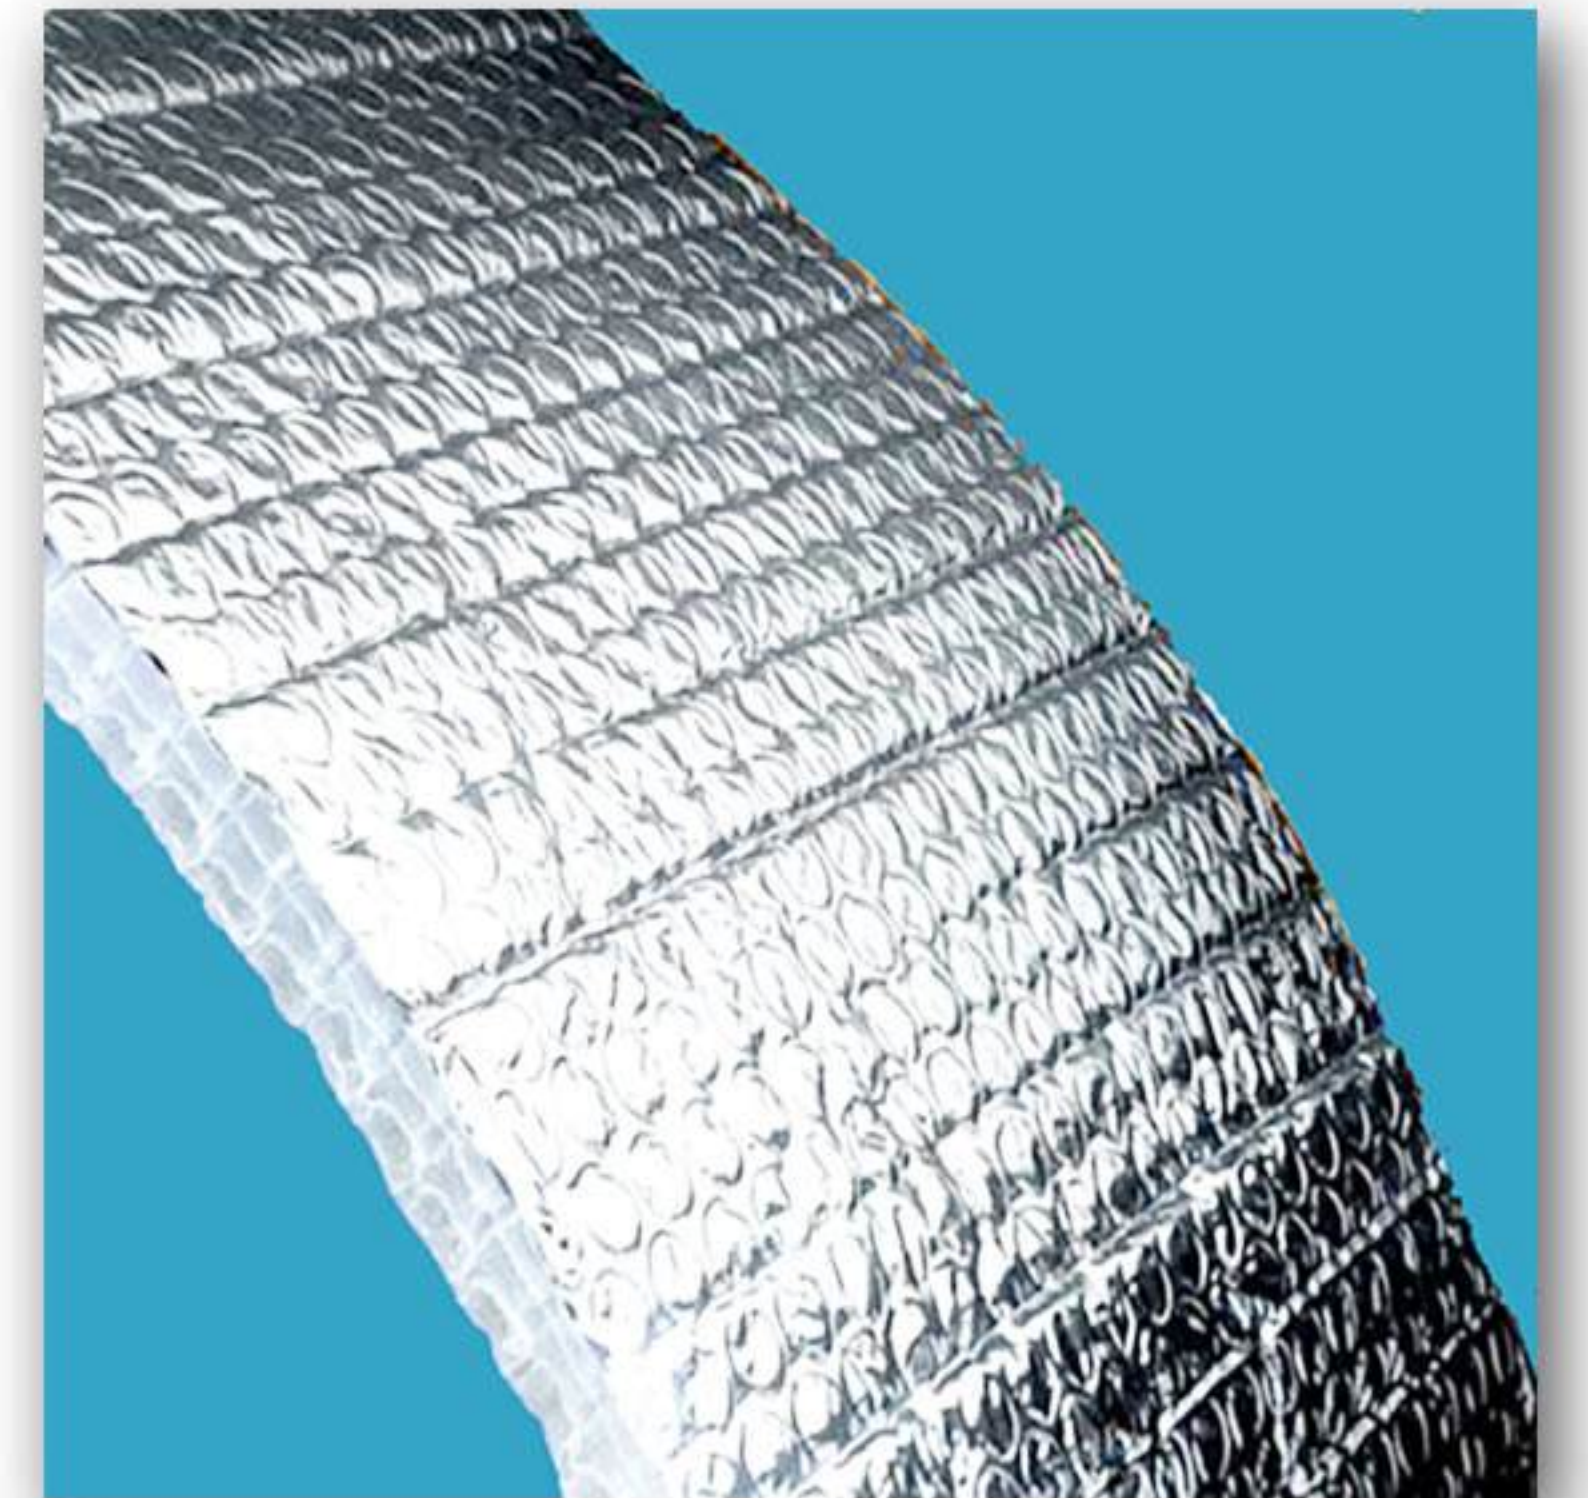

Standing structure which are useually un-supported

Puff Sandwich Panel

Used to reduce heat transfer from building

Insulation

Used to control heat transfer from outside of building

Louvers

Louvers are used for inlet air from wall side

Ridge Ventilator

They help release the hot air from the building

Skylight

Supply natural light from roof. It comes with POLYCARBONATE and FRP

Roof Sheets

Roofing sheets are metal roofing system made up of Corrugated metal

Decking Sheets

Used in Mezzanine building for shuttering purpose

Turbovent

Used for ventilation powered by wind

Our Prestigious Clients

Balrampur Chini Mills Limited

Completed Projects

Asmoli : Sugar Godown
37,000 Sqft

Dabra MP : Sugar Mill
15,000 Sqft

Dhampur : Baggas
Godown 60,000 Sqft

Ghaziabad:
Industrial Shed 45,000 Sqft

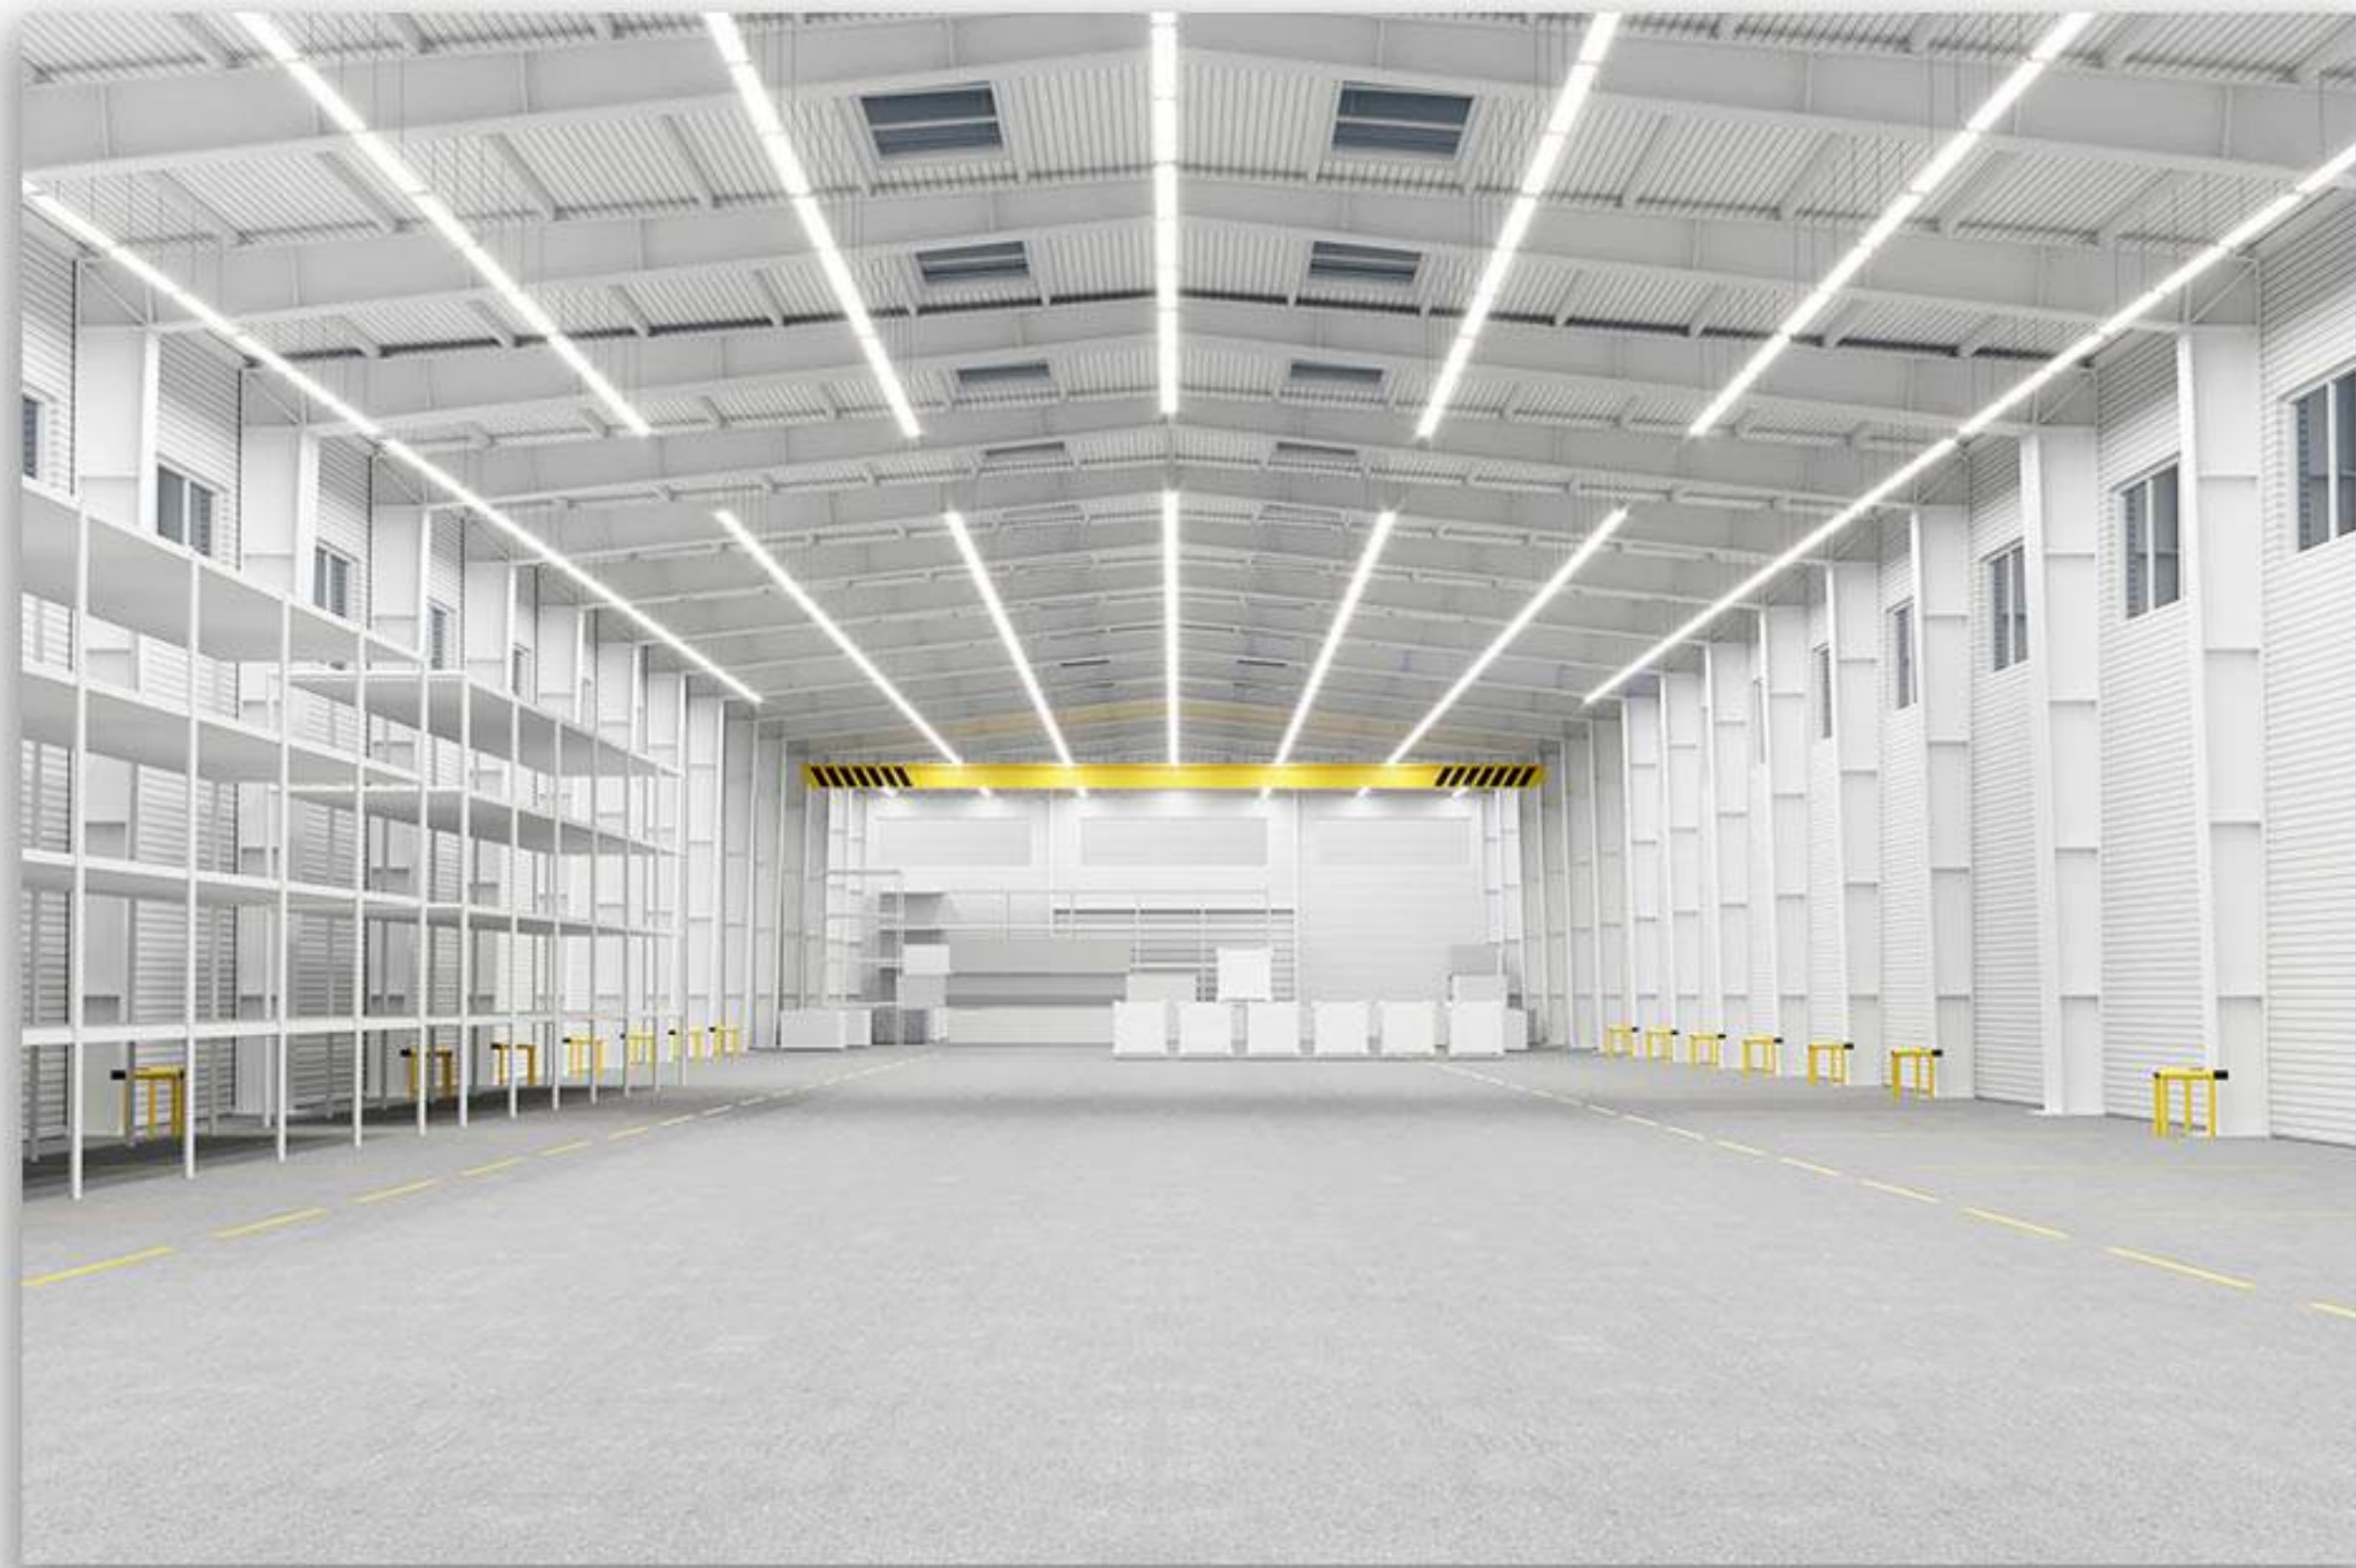

Ghaziabad : Grofers
Godown 1,35,000 Sqft

Kanpur : Sugar Godown
58,000 Sqft

Completed Projects

Ghaziabad : International Agrow
Food 40,000 Sqft

Amarkantak: University
4,50,000 Sqft

Guleria: Sugar Godown
39,000 Sqft

Karnal: 90,000 Sqft

Aligarh : 1,10,000 Sqft

Datia: 95,000 Sqft
